Professional Summary

Frontend Developer with 2+ years of hands-on experience developing responsive websites and web applications using **HTML5, CSS3, JavaScript, React.js, Bootstrap, and Tailwind CSS**. Experienced in translating UI/UX designs into frontend interfaces, building **React components**, integrating **REST APIs**, and working with **WordPress/PHP-based websites**. Worked on international fintech, trading, and event platforms using React and traditional frontend technologies, with practical experience collaborating with **Laravel backend teams**.

Professional Experience

Frontend Developer

Trasol Technologies & Events | Oct 2024 – May 2026

- Translated UI/UX designs into frontend interfaces, working from Figma/design specifications, typography, images, content, spacing, and layout details.
- Developed pages and interactive sections using **HTML5, CSS3, JavaScript, Bootstrap, and React.js**, selecting the appropriate approach based on project requirements.
- Built React features with functional components, Hooks, props, state, conditional rendering, and reusable UI components.
- Connected frontend applications to **REST APIs using Axios**, handling asynchronous requests, API responses, dynamic content, and frontend data rendering.
- Worked on international **fintech, trading, and event platforms**, implementing areas such as speaker profiles, exhibitor information, agendas, schedules, event details, and interactive sections.
- Worked with **WordPress/PHP projects**, converting frontend layouts into WordPress templates and modifying existing theme/template files.
- Used **XAMPP** for local WordPress development and testing and **FileZilla** for transferring website files to hosting environments.
- Collaborated with **Laravel backend developers** on API integration, frontend data requirements, and connecting UI functionality with backend services.
- Investigated frontend issues using browser developer tools and resolved layout, responsive, JavaScript, API, and browser-specific problems.
- Used Git/GitHub for source control and worked with designers, backend developers, and team leads during feature development and revisions.

Frontend Web Developer Intern

Cognitive i IT Solutions (P) Ltd | Apr 2024 – Sep 2024

- Developed client websites and application interfaces using **HTML5, CSS3, Bootstrap, JavaScript, and React.js**.
- Converted design references into structured frontend layouts and implemented responsive behavior across desktop and mobile breakpoints.
- Built React components, consumed REST APIs with Axios, fixed UI issues, and worked with the development team to deliver assigned features.

Projects

Online Trading Expo – Event Website – [Live View](#)

- Developed the website from UI designs using HTML, CSS, Bootstrap, and JavaScript, including structured event and content sections.
- Converted the completed frontend into a **WordPress/PHP implementation** and worked with the site locally through XAMPP.
- Prepared website files for hosting and transferred project files using FileZilla.

Money Expo Abu Dhabi 2026 – Event Management Platform – [Live View](#)

- Developed React.js frontend features for an international fintech event platform, including event information, speakers, exhibitors, and agenda-related sections.
- Implemented component-based UI and integrated backend APIs to render dynamic event data.
- Worked from provided designs and handled frontend behavior, responsive layouts, UI corrections, and feature updates.

AI-Powered Portfolio Builder (MERN + Gemini AI) – [Github](#)

- Built a full-stack portfolio generation application with a React frontend and Express.js backend.
- Integrated an AI API to generate portfolio content and connected the frontend workflow with backend endpoints.
- Implemented data handling with MongoDB and developed the interface for entering information and previewing generated content.

AN Paints – Full Stack E-commerce Application (MERN) – [Github](#)

- Built a personal full-stack e-commerce application covering product management, product details, cart, wishlist, authentication, and CRUD workflows.
- Used MongoDB for persistent data and worked with frontend state, API requests, responses, and application data flow.
- Developed the React frontend and connected application features to Express.js REST APIs.

Technical Skills

Frontend Technologies: HTML5, CSS3, JavaScript (ES6+), React.js, Bootstrap, Tailwind CSS, Responsive Design

API Integration: REST APIs, Axios, JSON, HTTP Methods

Tools & Version Control: Git, GitHub, VS Code, WordPress, XAMPP, FileZilla, Postman

Backend: Node.js, Express.js, MongoDB (NoSQL), CRUD Operations

Courses & Training

Full Stack Development (MERN Stack)

Imagecon Academy | Oct 2023 – Apr 2024

- Practical training in **HTML, CSS, JavaScript, React.js, Node.js, Express.js, and MongoDB**, including CRUD applications, REST API integration, and full-stack application development.

Education

Bachelor of Engineering – Mechanical Engineering

Paavai Engineering College | 2020
